1845-1855

26-46 Wheeling St. (North side)

Baltimore, Md.

Private access

This side of Wheeling St., east of Harden Ct. and west of Light St., is improved by several different groups of two story plus attic, two bay wide brick houses with gable roofs, built by several different local builders, most notably William and Samuel Harman. The houses were built contemporaneously with John S. Gittings's similar rows on the south side of Wheeling St. and the north side of nearby Hamburg St.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This pair of two story plus attic brick houses with gable roofs was built in the early 1850's and formed part of a group of such houses extending along this side of Wheeling St. Both houses have been covered with formstone.

The houses are two and a half stories in height, 12' wide, and occupy lots 50' deep. The houses are two rooms deep and each has a one story high, two bay deep rear addition. The houses are constructed in common bond but the facades have been covered with formstone. The low-pitched gable roof has a two-tier brick cornice. Each house has a double rectangular chimney located centrally along the partition wall between the two houses, on both the front and rear roof gables. Each house also originally had a rear end chimney, located at the northern end of the addition, but these no longer remain.

Because of the formstone covering, the original treatment of the lintels and sills can no longer be seen. It appears, however, that 32 Wheeling St. originally had segmentally arched brick lintels on the first and second story openings and flat lintels on the attic story windows, and that 34 Wheeling St. had flat lintels on all of its openings. All of the window openings are currently filled with 1/1 double hung sash. Both houses have Mission-style oak doors set beneath single light transoms. The transom area of 32 Wheeling St. is filled with a piece of stained glass.
